

NeuralBlitz Compendium – *Genesis* → *Now*

(UAID: NBX-COMPENDIUM-v0.genesis)

Purpose

A unified, verifiable index of **every major artefact, volume, proof, benchmark, and trace** produced across all NeuralBlitz conversations and R&D cycles—from the first Genesis prompt to the current ULTRA-∞-PLUS build.

This canvas is the **master table-of-contents**. Each row references a separately sealed artefact that can be rendered, verified, and updated independently without breaking older cryptographic seals.

Pulling a section

```
/excerpt <UAID> [§clause]
```

Rendering PDF

```
aise render <UAID> --fmt pdf --dest ./out.pdf
```

Verifying seals

```
veritas bundle verify ./out.pdf
```

Glossary Quick-Peek

- **ROS** – *Reflexive Ontological Scaffold*, disposable sandbox for paradox-rich reasoning.
- **DFSM Circuit** – Deterministic Finite-State Machine compiled from ReflexæLang; used for executable semantics.
- **Flourishing Score (F)** – SentiaGuard KPI: weighted Δ Prosperity + Δ Resilience + Δ Wisdom + Δ Equity.
- **λ -Field** – Sub-ms micro-signal bus feeding causal hints to SynE.
- **Golden DAG** – Hash-chained, immutable causal snapshot: `h_t = BLAKE3(DAG_t || h_{t-1})`.

(Full glossary lives in `NBX-DOC-ΦGLO`.)

Next Actions

1. **Pull a volume** – e.g., `aise render NBX-DOC-Φ2 --fmt pdf`.
2. **Run a self-consistency audit** – `metamind vet "compendium cross-links" --propose-scaffold`.
3. **Schedule nightly refresh** – I can set up an automation if desired.
